

BROADWAY Resurfacing Project - Rossi Street to Ridenbaugh Canal

The Idaho Transportation Department will rehabilitate a 1.5-mile section of Broadway Avenue (U.S. 20) in Boise, beginning early September 2008.

The project will repair Broadway from Rossi Street south to the Ridenbaugh Canal, near the Federal Way overpass. This is the second and final stage of a repaving project that began in June 2003 with the resurfacing of Broadway between the Boise River Bridge and Rossi Street.

Sections of roadway are deteriorated, cracked and rutted. The project will extend the life of the roadway and result in a smoother ride.

To minimize impacts to motorists, crews will work a

weekday evening and overnight schedule. All lanes will remain open from 8 a.m. to 6 p.m. No work will occur between 8 a.m. Friday and 6 p.m. Sunday. At least one lane in each direction will remain open during construction.

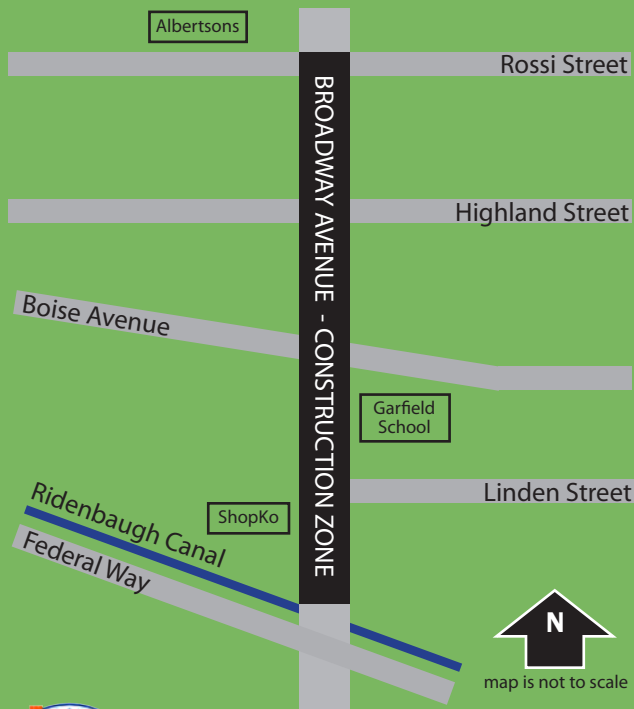

All efforts will be made to maintain cross street and business access, however temporary closures as the paving process moves through the project, can be expected.

The project is scheduled for completion in late October.
